

UNITY

M. Becattini

Life is like a big tree, we are the leaves
We people of the world
Is it just a very good idea, or do you really believe in it?
These aren't just a few words... you can start from those who live
around you
You don't really need to go so far away

Yes I know but let me look around
I see a lot of people
But only a few friends then desert comes
And nobody hold out their hand
And yet you'll find inside our little stories something...
a tiny seed is sprouting here
If you look with new eyes
then you can see

Unity

**I don't think it's just a word but
You can turn it into
Reality
When all hearts will join together
It will be forever
It will be
A new season all around the planet
Then love and peace like flowers will grow
If unity you sow**

Unity

Like a cracked and thirsty ground you know the world just need it

Unity

**We will cry this word out loud
Because this is our dream now**

Unity

**And the earth will come to have a heart again
A beating heart for everyone
As bright as a new Sun**

And it won't always be easy
Going through so many splits
Or it won't even be possible
To live in unity
But just believe that every failure and disappointment
Surely some day will bloom
From pain and sorrow
Some day will bloom
